“AT AL MADINA LOGISTICS, WE PROVIDE INTEGRATED LOGISTICS SERVICES TO OUR CLIENT THROUGH STORAGE, INVENTORY MANAGEMENT AND DISTRIBUTION SERVICES.”

Mahmood Sakhi Albulushi serves as CEO of Al Madina Logistics (AMLS) and CEO of Muscat Container Depot. Al Madina Logistics is the leading logistics provider in Oman and has the leading distribution centre in Oman, certified with ISO:22000. Under Albulushi's leadership, AMLS has led the way in quality logistics facilities and services in Oman, and developed and operated the first and only dry port in Oman.

Before joining Al Madina Logistics, Albulushi was group general manager of the prestigious Golden Group of Companies in Oman and has extensive leadership experience. He is a member of Oman-Bahrain Business Council and is an MBA graduate from Franklin University, Ohio, the US. Albulushi reports seeing continuous opportunities in Oman's logistics sector and considers more potential to tap into within the country, thanks in part to its strategic location. AMLS is currently planning additional logistics centres in various regions in Oman. In April this year, Al Madina Logistics entered into a contract to provide storage and supply management services for Oman Oil Marketing Company (Oman Oil).

Al Madina Logistics will provide outsourced storage services for the petroleum derivatives and engine oil. “We are proud and grateful for our selection by Oman Oil Marketing Company, a leader in oil service marketing in Oman, to provide integrated logistics solutions and services that contribute in supporting and developing Oman Oil's basic services, thus improving its competitiveness and reduce cost,” said Mahmood Sakhi Al Bulushi, chief executive officer of Al Madina Logistics.

“At Al Madina Logistics, we provide integrated logistics services to our client through storage, inventory management and distribution services. Thanks to the experience, technology and comprehensive infrastructure, Al Madina Logistics achieved a leading position in providing outsourced logistics services in Oman at the highest international standards,” he added.

Al Madina Logistics operates one of the largest distribution centres in Oman at Barka and has since 2012 established additional facilities in Sohar, Nizwa, Salalah and Duqm.
